

## Configuring printers, rolling out updates and managing the print infrastructure takes time and money

Running a HP printer fleet?

Looking to leverage the cloud to take the pain out of print?

**There's an app for that.**

---

EveryonePrint Hybrid Cloud Platform (HCP) App for HP Workpath-enabled multifunctional printers, enables organizations to migrate the entire print infrastructure to the cloud in a matter of minutes.

- ◆ Completely serverless
- ◆ Configure and manage the fleet from a web-based interface
- ◆ Deploy new devices in minutes

# Secure print completely in the cloud

---

HCP for HP Workpath is a true cloud solution – the only hardware installed on-premise is the print devices themselves.

## Reduce the cost and complexity associated with a traditional print environment

---

### ◆ Easy to use

HCP for HP Workpath makes it easy to deploy, configure and control the entire printing infrastructure using a web-based interface. Plus ongoing management, installing updates and adding new devices, can be handled anytime and from anywhere.

### ◆ Best-in-class security

This fully cloud-based solution is also secure. The platform does not require a VPN from the cloud to the printers and communication is solely from the printer to the cloud. It provides the strongest security between endpoints including encryption of data at rest, and enables organizations to use their own Trusted CA certificates.

### ◆ Print your way

Print jobs can be stored locally and delivered directly to the printer without leaving the company network, can be securely stored in the cloud, or a combination of both. Once a user authenticates at any device, HCP seamlessly formats the print job including all finishing options, and quickly sends to the printer.

### ◆ Zero upfront costs

HCP is fully flexible, organizations can scale consumption up and down according to business needs and simply pay for the licences they need.

### ◆ Seamless management

HCP is a scalable and flexible solution that is always on, always up to date and always secure. It makes ongoing management seamless, saves time spent supporting print servers, troubleshooting and keeping on top of security patches, updates etc. Plus, new printers can be added and available in a matter of minutes.

### ◆ Faster deployment, lower costs

HCP is an all-in-one print infrastructure solution platform that reduces the pressure on IT and lowers support costs. End-users can easily add or search for devices available to them. It's also possible to set location aware printers, meaning that users working across different branches, offices or departments can seamlessly and securely access a print device across any network or location.

Use HCP to modernize the print infrastructure in a way that suits your business, confident that it has the flexibility to accommodate your needs now and in the future.
