

Kofax Service Provider Program (KSPP) for Power PDF Advanced

PROGRAM OVERVIEW

PDF is the standard format for business document collaboration. Yet most users lack adequate PDF power. The high price of competitor solutions makes powerful PDF software unobtainable for most, while the limited capabilities of low-priced alternatives leave users powerless. As a result, collaboration and productivity are hindered.

Kofax Power PDF Advanced puts an end to all of that. Power PDF Advanced provides all the capabilities business users need at a price businesses can justify. So now enterprises can put PDF on every desktop—boosting productivity and eliminating format-dependency bottlenecks that hinder workflows and slow down business.

Knowledge workers can create, assemble, convert, edit, search, secure, sign, print and validate PDF documents and forms with unprecedented ease and speed. For demanding business users, Power PDF Advanced is the next-generation PDF solution that delivers performance, ease of use and value as never before.

KOFAX SERVICE PROVIDER PROGRAM

With the Kofax Service Provider Program (KSPP) for Power PDF Advanced, you can license Kofax Power PDF Advanced on a monthly basis to host as an application for your customers.

The KSPP gives you the ability to deliver next generation PDF capabilities through your hosted environment, providing your customers with the most current Kofax PDF software. You simply pay for licenses based on the volume that you make available to your customers each month. There are no start-up costs, long-term commitments or ongoing support and maintenance fees. Once signed up to the program, you can download Power PDF Advanced and access support directly from Kofax.

KOFAX

PROGRAM DETAIL

Kofax Service Provider Program (KSPP)

The KSPP is for organizations that want to offer hosted PDF software to their customers. Licenses under this program are subscription licenses, not perpetual licenses, and can be used through the term of the agreement. Usage of the licenses must be reported to your KSPP reseller on a monthly basis. The program also gives you the ability to use a reasonable number of licenses for demonstration, support and evaluation purposes.

KSPP utilizes simple volume-tiered price banding at the Service Provider level. The program includes a low minimum monthly fee that allows for up to 5 seats.* Once you reach that threshold, the higher the number of seats you report, the lower the individual license price. Full pricing detail can be provided by contacting your KSPP reseller.

Accessing Kofax Power PDF Software

Once you have signed the Kofax Service Provider License Agreement for Power PDF Advanced with your reseller, you will receive a Unique Serial Number and be given access to create a Kofax Network account. From the Kofax Network site, you can download Power PDF Advanced directly and gain access to Kofax technical support.

Reporting

At the end of each calendar month, as a Service Provider, you must submit a monthly usage report to your reseller in the format they provide you. The monthly usage report should include the total number of seats of the Kofax products provided to End Customers by Service Providers as Software Services. The report should also include the number of seats* used for demonstration, support and/or evaluation purposes which are non-chargeable.

Support

The KSPP provides all relevant updates, upgrades and bug fixes. As a Service Provider, you can access and download all upgrades for covered products via the Kofax Network portal. Kofax sends notifications of new product versions availability on the Kofax Network. In addition, you can contact our support team using the Kofax Network portal, and ask technical questions or report a problem. As a Service provider, you are responsible for providing technical product support for the Kofax licensed products you deliver to your customers.

* A seat or license is defined as each computer (a) on which the Kofax Product is either installed or run, or (b) from which the Kofax Product is accessed (e.g., a computer, such as a desktop, used to access the applicable Kofax product from a server).

PDF UNCOMPROMISED

For demanding business users, Power PDF is the next generation PDF solution that delivers performance, ease of use and value as never before, freeing you from the compromises of traditional PDF applications. Work smarter with PDF software designed to make document-based processes easy.
