

# Why should clinicians use Dragon Medical One instead of non-medical speech recognition?

Nuance provides a range of Dragon solutions for different types of organisations and users. We advise clinicians use Dragon Medical One as the vocabularies and commands provide a far superior experience compared with non-medical speech recognition. Dragon Medical is compatible with leading clinical information systems and is a secure and compliant solution for the UK NHS.

Themes	Dragon Medical Solutions	Non-medical speech recognition
<b>Security &amp; Compliance</b>		
Hosted within NHS approved Microsoft Azure in the United Kingdom	Supports the high availability, business continuity, and security demands of the NHS.	
Health and Social Care Network	Our Dragon Medical cloud services may connect via HSCN into NHS organisations incl. hospitals and clinics.	
NHS DCB0129* (Data Collection Board) standard	Nuance has met the requirements for this standard for its five solutions available in the UK: Dragon Medical One, Dragon Medical Advisor, PowerScribe 360, Dragon Medical Workflow Manager and Winscribe Dictation. As a requirement for this standard, Nuance has appointed a Clinical Safety Officer who ensures that the processes defined by the clinical risk management process are followed.	

\* DCB0129 is an NHS information standard published under section 250 of the Health and Social Care Act 2012. It provides a set of requirements to promote and ensure the effective application of clinical risk management by those organisations that are responsible for the development and maintenance of Health IT Systems for use within the health and care environment.

Themes	Dragon Medical One	Non-medical speech recognition
